Amendment Responsive to Office Action of August 2, 2004  
December 31, 2004  
A-1906

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A mobile system for providing access to remote sources of electronic data, comprising:

a mobile communications device having a first communications link for accessing a remote source of electronic data;

a data input interface for inputting data for transmission over said first communications link; and

a ~~separated~~ sidekick display which communicates with said mobile communications device via a second communications link;

wherein said mobile communications device functions as the central data processor for said mobile system.

2. (Original) The mobile system as recited in Claim 1, wherein said mobile communications device comprises a mobile phone.

3. (Original) The mobile system as recited in Claim 1, wherein said data input interface comprises a keyboard.

4. (Original) The mobile system as recited in Claim 1, wherein said first communications link comprises a wireless link.

5. (Original) The mobile system as recited in Claim 1, wherein said second communications link comprises a BLUETOOTH link.

A-1906

6. (Currently Amended) The mobile system as recited in Claim 1, wherein said ~~separated~~ sidekick display comprises an LCD display.

7. (Currently Amended) A method of accessing a remote data source using a mobile communications device, comprising:  
linking said mobile communications device to said remote data source; and  
linking said mobile communications device to a ~~separated~~ sidekick display;  
wherein said mobile communications device functions as a central processing unit for said mobile communications device.

8. (Original) The method as recited in Claim 7, wherein said first linking step is performed wirelessly.

9. (Original) The method as recited in Claim 8, wherein said wireless first linking step is performed using a WiFi system.

10. (Original) The method as recited in Claim 8, wherein said wireless first linking step is performed using a wireless phone network system.

11. (Original) The method as recited in Claim 7, wherein said second linking step is performed wirelessly.

12. (Original) The method as recited in Claim 11, wherein said second linking step is performed using a BLUETOOTH link.

13. (Original) The method as recited in Claim 7, wherein said second linking step is performed via a wired link.

14. (Currently Amended) The method as recited in Claim 7, wherein said ~~separated~~ sidekick display comprises an LCD monitor.

15. (New) The mobile system as recited in Claim 1, wherein limited graphical data processing functions required to convert data for display on said sidekick display are performed outside of said mobile communications device.

16. (New) The method as recited in Claim 7, wherein limited graphical data processing functions required to convert data for display on said sidekick display are performed by a component other than said mobile communications device.

17. (New) A mobile system for providing access to remote sources of electronic data, comprising:

a mobile communications device having a first communications link for accessing a remote source of electronic data;

a data input interface for inputting data for transmission over said first communications link; and

a sidekick display which communicates with said mobile communications device via a second communications link;

wherein said mobile system does not include a central unit separate from said mobile communications device.

18. (New) The mobile system as recited in Claim 17, wherein said mobile communications device comprises a mobile phone.
